LITERATURE REVIEW

Headmaster Leadership

The principal is someone who leads an educational institution, whose role is so complex. In addition to playing a role in regulating and managing schools to be efficient and effective, school principals are also required to improve the performance of their employees. The principal becomes someone authorized to make and determine policies within the organization or agency to achieve its goals. (Gaol & Siburian, 2018)

The principal also plays a role in motivating employees to improve employee performance, especially in learning, if the principal succeeds in motivating employees, good employee performance will be achieved. On the other hand, without the principal's role, especially in motivating employees, there will be no optimal performance of employees because they think they are not valued as employees. (Gaol & Siburian, 2018)

Principal's leadership has been studied by previous researchers, namely: (Gaol & Siburian, 2018), (Farida & Mujianto, 2021), (Purwoko, 2018).

Teacher Performance

According to Darmadi (2018:34) teacher performance is the ability shown by the teacher in carrying out his duties or obligations. A performance can be said to be good if it can achieve the expected goals correctly. (Prabu & Puspitasari, 2015)

Teacher Performance Indicators according to Hasibuan in Physical (2013: 160) are: Mental Attitude (Work Motivation, Work Discipline and Work Ethics), skills, income level, social security and infrastructure.

Teacher performance has been studied by previous researchers, namely: (Prabu & Puspitasari, 2015), (Hasanah & Kristiawan, 2019), (Suciningrum, Rhamanda, & Handayani, 2021).

Loyalty

Loyalty is loyalty to do the maximum to maintain the good name of the organization where he works. Loyalty is meant not only to carry out his duties and obligations as a teacher according to his job description, but to do as optimally as possible – accompanied by high enthusiasm – to produce the best for the organization he occupies. (Kusniawati & Rafiudin, 2020)

Loyalty indicators according to Flippo are: Job satisfaction, compensation, effective communication, motivation given, work environment, career development, training procurement, work participation.

Loyalty has been studied by previous researchers, namely: (Andini, 2010), (Alurmei, 2019), (Kusniawati & Rafiudin, 2020).

Motivation

Motivation is a measure of how long a person can maintain their efforts. Motivated individuals will carry out tasks long enough to achieve their goals. Motivated individuals are critical to supplying organizations with new initiatives that are vital in a competitive world. (Hidayah & Santoso, 2020)

Motivation indicators according to P. Siagian are: Pride, needs, desire, job satisfaction, personal hope.

Motivation has been studied by previous researchers, namely: (Ufaira & Hendriani, 2019), (Hidayah & Santoso, 2020), (Suciningrum et al., 2021).

RESEARCH METHODS

In writing this scientific article, the researcher uses qualitative methods and literature studies or library research. By reviewing theory and reviewing previous articles that are relevant to this research, especially in the scope of Marketing Management. In addition, the researchers collected data sourced from the Google Scholar application and used Mendeley as a bibliography reference.

In qualitative research, literature review must be used consistently with methodological assumptions. This means that it must be used inductively so that it does not direct the questions posed by the researcher. And one of the reasons for conducting qualitative research is that this research is exploratory. (Limakrisna & Ali, 2016)

DISCUSSION

Based on relevant theoretical studies and previous research, the discussion of this literature review article in the concentration of Human Resource Management is:

1. The Influence of Teacher Performance on Headmaster Leadership

Teacher performance is an indicator in seeing the success of a teacher in carrying out their duties in accordance with the workload given in accordance with the work standards that have been set within a certain period in order to achieve educational goals.

For this reason, the Principal's Leadership greatly determines the performance of teachers in order to provide the best teaching for students in schools in order to produce students who are superior and able to compete with other schools. By facilitating teachers in teaching and learning activities, giving awards to teachers with the best performance and also being able to accommodate the aspirations needed by teachers.

If a leader, in this case the principal, is not able to implement his role, the teacher's performance will not be optimal and create a culture of ignorance or indifference in the school environment. In addition, the lack of sympathy for the principal carried out by the teacher is due to the inability of the principal to lead.

Teacher performance has an effect on Principal Leadership, in line with research conducted by: (Nugraha, Rahmi, & Balsa, 2017), (Prabu & Puspitasari, 2015), (F. Saputra, 2022).

2. The Influence of Loyalty on Headmaster Leadership

The style of a leader in directing an organization (institution) greatly influences the level of personnel loyalty to the organization he represents. According to Welly in research conducted by Windy Sitorus said that to ensure the success of an organization requires superiors who understand the importance of employee motivation.

Work loyalty can arise because it is influenced by several factors including rational factors concerning things that can be explained logically, such as compensation, bonuses, career paths, and facilities provided; emotional factors related to feelings or self-expression, such as the work environment, the style of a leader, work culture, and appreciation at work; and personality factors related to work motivation, such as motivation, enthusiasm, physical and psychological conditions.

Loyalty has an effect on Principal Leadership, in line with research conducted by: (Supriyadi et al., 2019), (Corsini & Nugraha, 2021), (F. Saputra & Mahaputra, 2022), (Ali, Sastrodiharjo, & Saputra, 2022)

3. The Influence of Motivation on Headmaster Leadership

Leadership style shows the social relationship between an individual and other individuals and between people who are controlled and those who control in an organization. Work motivation that arises from a person is also one of the factors that will affect work morale which will later lead to teacher work loyalty in an institution. Work motivation is a psychological process that generates and directs behavior towards achieving goals or good-directed behavior at work.

Motivation is a measure of how long a person can maintain their efforts. Motivated individuals will carry out tasks long enough to achieve their goals. Motivated individuals are critical to supplying organizations with new initiatives that are vital in a competitive world.

Motivation affects the Principal's Leadership, in line with research conducted by: (Muzzamil, Fatimah, & Hasanah, 2021), (F. Saputra, 2021), (F. Saputra & Ali, 2022),
